1 Activation

Getting started with a Trial Activation

A Trial Activation allows you to evaluate the software for a limited period before purchasing a license. This guide explains how to request, activate, and verify your trial license.

- [Activation Types](#)
 - [USB protection \(dongle\)](#)
 - [UUID format \(Universally Unique Identifier\)](#)
- [Before You Start](#)
- [Step 1: Obtain your computer UUID or USB dongle](#)
- [Step 2: Register for a Trial License](#)
- [Step 3: Activate the Trial License](#)
- [Step 4: Verify the activation](#)
- [Troubleshooting](#)

By default, when you install Inedit products, it applies to trial licenses with a 30-day expiration date. You can start a 30-day trial to try out all of the features. If your dongle has already activated a trial license, you cannot start a new trial.

At the end of the trial period, you can revert to a final license or extend the trial. For more information about license levels, contact sales@inedit.com.

Activation Types

Inedit products support two types of activation: USB dongle protection and UUID. By default, when you install Inedit products, they apply for basic licenses with a 30-day expiration date.

USB protection (dongle)

The dongle is a hardware device that you can connect to a computer's parallel or USB port. The product is authorized to run on that computer as long as the dongle remains connected. This dongle will activate the software when an XDAT file is provided or the activation code is introduced. Supports multiple Inedit product activations.

UUID format (Universally Unique Identifier)

Activations with UUID format do not require the plug-in of any hardware devices. It will use a unique identifier number that will activate the program when an XDAT file is provided, or the activation code is introduced in the required field.

Watch Video: <https://www.youtube.com/embed/HISoaawTG-g?&wmode=opaque>

Before You Start

Before requesting a trial activation, make sure that:

- The software is installed on your computer.
- You have an active internet connection.
- You have administrator permissions on the computer.
- No previous trial activation is currently active on the same machine.

Step 1: Obtain your computer UUID or USB dongle

The trial license is linked to your computer's unique identifier (UUID).

1. Launch the application.
2. The Activation Manager will open automatically if no valid license is detected.
3. Locate the UUID displayed in the activation window.

INFO: The UUID uniquely identifies your computer and is required to generate the trial license.

Step 2: Register for a Trial License

This example is applicable to all Inedit products.

1. Fill in the account details in the required fields to register your dongle with your email and push the button "Continue".
 1. Contact name
 2. Company name
 3. Email address

The screenshot shows a web application window titled "nT neoTextil Panel". The interface has a dark theme. At the top, there's a header with the "nT neoTextil 8" logo on the left and a user profile icon labeled "macbook" on the right. The main content area is titled "Account details" and contains several input fields: "Full Name", "Company", "Email", "Email Confirmation", and "Country". Below these fields is a checkbox labeled "Subscribe to News". At the bottom right of the form area are two buttons: "Cancel" and "Continue". The footer of the application contains contact information: "Any question? Contact us at +34 937 912 821 or via sales@inedit.com" and "Inedit Software SL License Agreement-Privacy Policy". The "inedit" logo is centered at the very bottom, and the version "v8.4.0" is in the bottom right corner.

2. In the next step tell us why you want to try the product and push the button "Request Trial".

3. The next step is to validate your email account which requires one verification.

4. Check your received email and use the validation code that is valid for **15 minutes** for the next step.

Validate your account

Please enter '737964' number to validate your account. It's valid for 15 minutes.

Have questions? Contact us at +34 937 912 821 or via sales@inedit.com - [Privacy Policy](#)

©2018 Inēdit Software SL

5.

Enter the verification code in the required field. Click on the button "Continue". Once your registration is completed, you will be able to

nT neoTextil 8 0764650874 inēdit

Account verification

Please enter the 6-digit verification code we sent via [redacted]@gmail.com' e-mail

9 1 8 0 4 0

Didn't receive the code? [Send the code again](#)

[Cancel](#) [Continue](#)

Any question? Contact us at ☎ +34 937 912 821 or via ✉ sales@inedit.com Inēdit Software SL
License Agreement-Privacy Policy

change the registration email.

If you encounter issues with the verification code while registering for a trial license, follow the [troubleshooting](#) .

Step 3: Activate the Trial License

Once the registration is passed, the trial license will be generated by our team. Proceed with the following steps:

1. Open the software.
2. Wait for the Activation Manager to appear.
3. Wait for the confirmation message, which will indicate that the trial license has been validated.

Step 4: Verify the activation

To verify that the trial license is active: Confirm that:

1. The license status is valid.
2. The license type is Trial.
3. The expiration date is displayed.

Troubleshooting

Activation manager does not open

- Restart the application.
- Run the software as Administrator.
- Verify that no firewall or security software is blocking the application.

Activation Failed

If you experience any issues during the activation process, contact Inèdit Support and include:

- Product name
- Software version
- UUID/dongle
- Screenshot of the activation window
- Description of the error message

Providing this information will help us assist you more quickly.

[How to apply for XDAT \(offline\) application license activation](#)

[Troubleshooting Registration Verification Code on Form Submission in neoTextil](#)

How to apply XDAT (offline) application license activation

The activation of all Inèdit products, whether it is with a [trial license](#) or a purchased one, runs online by connecting the user's machine and dongle to our servers.

When the network conditions are different or it is not available so that our activator server cannot be reached, it's possible to activate all Inèdit applications offline using a file that contains the activation code for the user's product and dongle number. This file has an XDAT extension and can be loaded through a dialog available in any of our applications.

To obtain the XDAT file you need to contact your local distributor. Check our distributor list to find it, <https://www.inedit.com/en/company/distributors> . If you found no distributors in your area then contact us, at <https://www.inedit.com/en/contact> .

Once you are provided with the XDAT file, the way to proceed varies depending on the application to activate.

- [neoStampa](#)

 - [▶□ Watch the tutorial](#)
- [neoTextil](#)
 - [Network dongle activation](#)
- [neoCatalog](#)

neoStampa

1. Press and hold down the Shift key while you are opening the application. Do not release the key until the license installation dialog shows up with the program running. Go to **Help | Activation Keys...** to open the Activation window.

2. In the License window:

1. Scan the QR code to [register the dongle](#) . This registration is required to receive future updates.
2. Once the registration is complete and you have received the license file in .xdat format, save it in an easily accessible location, such as your Desktop.
3. Click the folder icon next to the license file field, browse to the .xdat file, select it, and then click **Apply** to install the license.

3. After activation, a dialog will display the activation result and all the requested neoStampa modules. You can open this dialog again at any time by clicking the **Info...** button. The license status is identified by three indicators:

Status	Description
 Valid – Lifetime	The license is valid and has no expiration date.
 Valid – Temporary	The license is valid but has an expiration date.
 Not Valid / Expired	The license is invalid or has expired.

INFO: Be aware that if you have other Inèdit licenses too, those will be listed in red, but only the one related to neoStampa will be activated (green).

4. In the bottom-left corner of the window, you can see all detected dongles currently connected to your computer. If more than one dongle is connected, select the one you want to use for the neoStampa license activation.

5. Press OK to continue the activation. With successful activation, neoStampa starts automatically.

Update with a new Activation

If your license has been updated (for example, from a temporary license to a full-time license), you will receive a new .xdat activation file. To update the license, follow these simple steps:

1. Copy the new .xdat activation file to the computer desktop or to the folder where activation files are normally stored.
2. Ensure that neoStampa is closed and that the dongle is connected to the computer.
3. Open neoStampa while holding down the Shift key until the Activation window appears. Alternatively, if the program is already running, select Help > Activation Keys... to open the Activation window.
4. Load the new .xdat file by following the activation procedure described above.

5. Click the **Reset...** button to remove the current XDAT license and then load the new activation file.

Watch Video: https://www.youtube.com/embed/HISoaawTG-g??si=tRjokE_15NCRJVxL&wmode=opaque

neoTextil

1. The Activation process is a one-time action. Plug in the green dongle and run Photoshop®.
2. Go on **File | Automate** and then click on **nT Activation Manager**. You will access the Product activation dialog.
3. The Activation Manager recognizes the number of dongles (65xxxxxxx), which is shown in the Personal Code field. Using UUID activation it will show the unique identifier number of 10 digits. You can check if the dongle or the UUID number and the Personal Code coincide, by pressing on the information icon (i) next to the Personal Code.

4. If you have multiple dongles plugged into the computer, you will be able to select the one you want to activate.
5. Next, type your personal data with one user and company name in the given fields. This information is merely for your record and has no purpose in the activation process.
6. Finally, select and apply the XDAT activation file with "Load...", which Inédit will also provide you via email or in a USB memory, together with the installer and documentation. The activation will process automatically.
7. Optionally, if you have received the activation code you can type or copy-paste the code and press the Activate button.
8. If the activation is valid, you will get the following successful activation notice:

Network dongle activation

We support net-dongle activations. The activation is managed by one local or remote activation server where multiple user stations can connect. In the activation manager, below the personal code tab, [you can enable](#) the option "Network dongle" to set up the connection to the activation server.

Watch Video: <https://player.vimeo.com/video/763718607>

neoCatalog

1. When neoCatalog is not activated it shows a "Manual activation" button on a black screen after logging in as Administrator.
2. The Activation Manager window opens to apply the activation code or XDAT file that Inèdit provides you via email or in a USB memory, together with the installer and documentation.
3. If you have received the activation code you can type or copy-paste the code in the field of 'Activation code'.
4. Click on the Activate button to proceed.
5. To start the activation, click on the Activate button, and once applied, restart the neoCatalog instance from [JavaMonitor](#) .

NOTE:

If you encounter issues during the activation replacement process, follow these steps:

1. The activation file is located at:

C:\Users\Public\Public Documents\Inèdit Software\InSwActivation.xdat

2. Replace this file with the activation file provided by Inèdit, ensuring it has the exact same name: InSwActivation.xdat. It is recommended to first rename the existing file (as a backup) rather than overwriting it directly.
3. After replacing the file, restart the JavaMonitor service or reboot the computer, following the instructions in this document.

Use multiple licenses on the same computer

Question

Can multiple licenses be used on the same computer with the same version of the software?

Answer

It is **not possible** to use two USB dongles (green USB keys) simultaneously on the same computer.

If you have multiple licenses, the license configuration may be reorganized by transferring the license drivers between dongles. For example:

- Two dongles with one license each can be reorganized into:
 - **One dongle containing both licenses**
 - **One empty dongle**

This allows multiple licenses to be available from a single USB dongle.

Next Steps

If you need to consolidate licenses, provide the following information to Sales (sales@inedit.com):

- The serial numbers of the USB dongles.
- The desired license configuration.

The Sales team will review the request and advise whether any costs or licensing changes apply.

What to do when neoStampa does not recognizes the USB Dongle

TABLE OF CONTENTS

- [Problem](#)
- [Possible cause](#)
- [Solution](#)
- [How to switch to a dongle from UUID?](#)

Problem

The USB dongle was not recognized by the computer.

Possible cause

The original USB port may not have detected the dongle correctly, or the connection may not have been stable.

Solution

1. Unplug the USB dongle.
2. Connect it directly to another USB port on the computer.
3. Avoid using USB hubs or docking stations.
4. Check the dongle light:

- **Continuous green light** : dongle is normally detected.
- **Flashing green light** : dongle may not be fully recognized or the connection may be unstable.

5. Dongle should be detected by the activation program, after Rockey4ND.
6. Restart the computer if the dongle is still not detected.
7. If the issue continues, test the dongle on another computer.

How to switch to a dongle from UUID?

1. Start **neoStampa** .
2. If the **Register Form** appears, close it using the **X** button in the top-right corner.
3. Wait until the **Activation Manager** opens.
4. Click the **Info** button to open the **License Log** .
5. Connect the USB dongle to the computer.
If the dongle is already connected, click the **Refresh** button.
6. In the **Found Dongle** menu, select the detected dongle.
7. Click **Retry** to validate the license using the selected dongle.
8. Check the **License Log** for detailed information about the dongle and license validation.
9. The **Activator Page** will display the license validation status.

Where to find neoCatalog activation Dongle or UUID number

Problem

We need to know the license number in order to make a new activation for neoCatalog.

Solution

Method 1 (neoCatalog Administration):

1. Login into neoCatalog.
2. Go to Preferences > Licensing.
3. You can see the currently used UUID or Dongle ID, you can also find more information like the status, availability, and number of devices...

Licensing							
License Details							
Valid activation codes. Please, remember that you have one year of support and updates. After this period, you must renew your license to have access to support and updates.							
Status	Dongle ID	Organization	Date	License type	Support and updates period	Licensed devices	Users
Ok	1763048680	MARC VALDEVEY	25/10/2018	neoCatalog Trial It will expire on 25/10/2019	Available until 25/10/2019.	1	0
Incorrect personal code	1763048680	INEDIT	12/01/2017	neoCatalog Trial License expired 1 year ago	-	2	0
Incorrect personal code	1763048680	MARC 2 INEDIT	04/04/2017	neoCatalog Trial License expired 1 year ago	-	0	0

Method 2 (Terminal):

1. Open Mac terminal.
2. Type 'cd /Library/WebObjects/Applications/neoCatalogWeb.woa/Contents/Resources/CGI-Executables/macOS/'
(/Library/WebServer/CGI-Executables in old installations).
3. Type './neoKeyManagerCGI -info'
4. In the result, you will see the attached keys on the computer.

```

Information:
Dongle Type:   Rocky4ND   Serial: 651422040   PersonalCode:64WP   UseDate:19-05-31
Dongle Type:   UUID      Serial:1763048680   PersonalCode:1QDE   UseDate:19-05-31
Dongle Type:   Hardware   Serial:      GQ05   PersonalCode:GQ05   UseDate:19-05-31

```

2 Troubleshooting

Activation Folder Permission (error - 5000, 999 or - 9999)

Activation Errors - 5000, 999, or - 9999 are user permission errors and occur even with administrator permissions. It is required to change the permissions in the user's shared folder. The reason is no permission to create the folder Inèdit Software (with è) and belonged activation file InSwActivation.xdat. In this article, we are now going to show how to solve the activation problem for the system platform Macintosh and Windows.

TABLE OF CONTENTS

- [Macintosh](#)
- [Windows](#)

Macintosh

1. Open a finder window and go to the /Users/Shared/Inèdit Software folder.
2. Select the folder and from the file menu, select 'Get Info'.

3. Check that the permissions are assigned correctly to all users with 'Read & Write'. If not, click on the permission where you can change it and apply changes to folder contents.

4. Repeat the activation process again from the application Activation Manager. The activation code will be written and activation proceeds successfully.

Windows

1. Download the attached Inèdit Software Empty.zip file and place it manually in C:\Users\Public\Documents
2. Uncompress the ZIP file. This folder includes an empty InSwActivation.xdat activation file.
3. In the case of neoTextil run Photoshop.exe as an Administrator.

4. Repeat the activation process again from the application Activation Manager. The activation code will be written and activation proceeds successfully.

Activation with not valid dongle despite license being up to date (error -14)

Problem

When an activation file or code is applied in the Activation Manager, it returns the notification that the activation is not valid or Generic error -14.

Cause

The reason is that the dongle has a wrong use date and the activation cannot be applied for security reasons. The use date can be verified by the Inedit support team in one remote connection using neoKeyManager.

neoTextil Step-by-Step

1. In Photoshop go to File | Automate | nT Activation Manager and click on the "I" button.

2. If the use date is in the future, then the use date is wrong.

3. Or open the "Licenses..." to see the activation history.

	Product(s)	Serial number	Status	Expiration
●	neoTextil		Incorrect personal code	17-06-01
●	neoTextil	65	Disabled	18-06-01
●	neoTextil		Incorrect personal code	18-06-01
●	neoTextil	65	Disabled	19-10-09
●	neoTextil		Incorrect personal code	19-10-09
●	neoTextil	65	Disabled	20-01-31
●	neoTextil		Incorrect personal code	20-01-31
●	Pack Rapport,Coverage,Colorations,Multicomia,TrappingPr...	65	Disabled	20-09-04
●	Pack Rapport,Coverage,Colorations,Multicomia,TrappingPr...		Incorrect personal code	20-09-04
●	Pack Rapport,Coverage,Colorations,Multicomia,TrappingPr...	65	Disabled	21-01-30
●	Pack Rapport,Coverage,Colorations,Multicomia,TrappingPr...		Incorrect personal code	21-01-30
●	Pack Rapport,Coverage,Colorations,Multicomia,TrappingPr...	65	Active	22-01-21
●	Pack Rapport,Coverage,Colorations,Multicomia,TrappingPr...		Incorrect personal code	22-01-21

65 (21-10-04), 04 (21-10-04) Done

neoStampa Step-by-Step

In neoStampa Activation Manager the error is shown in the status column as Generic error (-14) representing that the dongle use date is in the future.

1. Contact support@inedit.com to request one re-activation XDAT at Inedit.
2. When receiving the re-activation code, then you have to load it in the Activation Manager.

3. After applying it, it will still show a message that activation is invalid (code -14 or -15) or without success. No worry and proceed to next.
4. Check again the use date.
5. Now load the first XDAT activation that you have received before.
6. The activation should be applied and the application should start.

Dongle and Activation error after updating or restarting neoCatalog

If you're experiencing license activation errors with permission problems after updating neoCatalog, it can be frustrating and time-consuming to resolve. However, there are several reasons and steps you can take to fix this issue and get the software up and running. In this article, we'll walk you through the process of resolving license activation errors with permission problems.

TABLE OF CONTENTS

- [Problem 1: Crash of neoKeyManagerCGI](#)
 - [Solution: Verify dongle information](#)
- [Problem 2: Cannot upload license XDAT or code](#)

- [Solution 1: Verify Permissions](#)
- [Solution 2: Change Permissions on the Activation File](#)
- [Problem 3: Cannot reach Web Activator](#)
 - [Solution : Verify Network](#)

Problem 1: Crash of neoKeyManagerCGI

After restarting neoCatalog and logging in, then one crash is displayed. This is caused by one dongle error when there is a detection problem or erased.

```
exception: java.lang.NullPointerException
at neocatalog.app.utilities.NeoKeyManagerUtils.getUUID(NeoKeyManagerUtils.java:998)
at neocatalog.app.utilities.NeoKeyManagerUtils.tokenContentsForNam(NeoKeyManagerUtils.java:1116)
at neocatalog.app.utilities.NeoKeyManagerUtils.namUiUrl(NeoKeyManagerUtils.java:1176)
at neocatalog.app.utilities.NeoKeyManagerUtils.namUiUrl(NeoKeyManagerUtils.java:1172)
at neocatalog.app.utilities.NeoKeyManagerUtils.hasXdatFromNAM(NeoKeyManagerUtils.java:1213)
at neocatalog.app.components.ActivationManager.appendToResponse(ActivationManager.java:53)
.....
```

Solution: Verify dongle information

1. Open terminal/cmd application
2. neoKeyManagerCGI is used to verify the dongle information. Navigate to the folder path in macOS or Windows
/Library/WebObjects/Applications/neoCatalogWeb.woa/Contents/Resources/CGI-Executables
3. Take the [neoKeyManagerCGI](#) and drop it into the terminal/cmd and call -info
4. The KeyManager will return the information of the dongle, UUID, and hardware code. If the Rockey4ND Serial number is empty or corrupted, the dongle is erased.
5. **The dongle must be removed from the computer, or else the application won't be able to use the UUID!** Once removed, call -info again and it should return the UUID and hardware code only.
6. Proceed with one UUID activation.

```
ARTDAVATART:~ Av4t4r$ /Library/WebObjects/Applications/neoCatalogWeb.3.16.8.woa/Contents/Resources/CGI-Executables/macOS/neoKeyManagerCGI -info
Information:
Dongle Type:   Rockey4ND   Serial:         PersonalCode:   UseDate:22-12-21
Dongle Type:   UUID       Serial:0681581342 PersonalCode:0JRC UseDate:23-04-19
Dongle Type:   Hardware   Serial:        K1MX  PersonalCode:K1MX UseDate:23-04-19
ARTDAVATART:~ Av4t4r$
```

Problem 2: Cannot upload license XDAT or code

After uploading manually a new license XDAT or code in the neoCatalog activation manager, then the error message appears " **Sorry, neoCatalog is not activated in this computer** ".

Sorry, neoCatalog is not activated in this computer.

Solicitar una nueva licencia

Activar

Solution 1: Verify Permissions

The first step in resolving license activation errors with permission problems is to verify that you have the appropriate permissions to activate the software. This may involve checking that you have administrator-level permissions or ensuring that the user account you are using has the necessary privileges.

Solution 2: Change Permissions on the Activation File

If none of the previous steps have worked, you may need to change the permissions on the activation file. To do this, right-click on the activation file and select "[Properties](#)" (Windows) or "[Get Info](#)" (macOS) . From here, add the appropriate user or group and give them "Read&Write" permissions. Load the XDAT and restart neoCatalog.

Problem 3: Cannot reach Web Activator

After restarting neoCatalog and logging in, then I don't see the Web Activator but instead a gray page. This is caused by permission problems (see Problem 2) or a lack of network settings.

Solution : Verify Network

Sometimes, network or firewall settings can interfere with the activation process. To fix this, temporarily disable your firewall and try activating the software again. Double-check with the Web Activator URL and call in the Web Browser <https://nam.inedit.com/cgi-bin/WebObjects/nam.woa/> . If the network settings are OK, then it should return to the activator application page.

[Where to find neoCatalog activation Dongle or UUID number](#)

[Licensing Management of neoCatalog](#)

Error: Multiple Dongles with Serial Number XXXXXXXXXXXX

Issue

In rare cases (approximately once every few thousand installations), the software may display the following error:

This occurs when two dongles are assigned the same internal UUID, resulting in a duplicate identifier conflict.

Resolution

To resolve this issue, you have two options:

- Activate the dongle associated with your license.
- Use a different computer, if available, to avoid the UUID conflict.

Check your dongle

Do you have the green USB dongle in your possession? If yes, please send us the dongle serial number, which begins with 65xxxxxxx or 70xxxxxx. This will allow us to verify your dongle and provide the appropriate solution.

Need a dongle?

If you do not have a dongle and need to obtain one, please contact the Inédit Sales team at sales@inedit.com. They will be happy to assist you with purchasing or replacing a dongle.

License Activation Error: "File format is not valid" or "Contains an incorrect path"

Issue

During the license activation process, one of the following error messages appears:

Error 1

```
Error: File format 'C:\Users\Public\Documents\neoStampa 10\ActivatorTemp\NewActivation.xdat' is not valid for this application. Unable to load the file.
```

Error 2

```
C:\Users\Public\Documents\neoStampa 10\ActivatorTemp\NewActivation.dat contains an incorrect path
```

Cause

These error messages are typically caused by insufficient permissions on the folder where neoStampa stores the license activation files.

If the application cannot read from or write to this folder, the activation files may become inaccessible or invalid, resulting in one of the errors above.

Solution

Verify the permissions of the following folder:

```
C:\Users\Public\Documents\neoStampa 10\
```

Make sure that:

- The folder and all its subfolders (including **ActivatorTemp**) have **Read** and **Write** permissions.
- The current Windows user has **Full Control** of the folder.
- No security software or Windows policies are preventing the application from accessing or modifying the files.

After updating the permissions:

1. Close neoStampa.
2. Confirm that the folder permissions have been applied correctly.
3. Restart neoStampa.
4. Repeat the license activation process.

If the issue persists

If the activation still fails after verifying the folder permissions, contact Technical Support and provide:

- A screenshot of the error message.
- The permissions configured for the **neoStampa 10** folder.
- Any security software or antivirus running on the computer.

Licenses loading in neoTextil takes too long when unplugging dongle

Problem

The "Licenses..." button in the nT Activation Manager takes too long to load its content when plugging and unplugging the dongle.

How to reproduce this problem

1. Plugin a dongle and start the nT Activation manager.

2. Click on the "Licences..." button.

3. Click on "Done" and unplug the dongle.

4. Click on the "Licenses..." button again and notice that the "Licenses" dialog takes some time until it is shown.

Cause

neoTextil loads the dongles when Adobe Photoshop starts and when nT Activation Manager starts. Plug-in and unplugging dongles in runtime are not supported (fewer possibilities for piracy or users using two computers with the same dongle).

Solution

Plug in your dongle before starting Adobe Photoshop. If you experience some problems related to this subject, please close Adobe Photoshop, plug in your dongle, and restart Adobe Photoshop.

Most common activation error codes & messages

For more information, please contact sales@inedit.com.

In case of doubt or for further information, please contact [Inédit Technical Support](#).

Here is the list of the most common activation error codes and messages.

Code	Message
0	Your activation is successful.
1	The dongle update was successful.
-1	Mistype error. The code characters mismatch. Please repeat the typing.
-2	Incorrect product. You are trying to activate the wrong product. Please check the product.
-3	Incorrect product. You are trying to activate the wrong product. Please check the product.
-4	Incorrect client name. You are trying to activate the wrong client name. Only for client code + dongle number.
-5	Incorrect dongle number. You are trying to activate the wrong dongle number. Only for client code + dongle number.
-6	Incorrect dongle or hardware. This dongle is incorrect for your activation code or the dongle is not found.
-7	Activation is not valid for this version because support is expired. Please contact your dealer.
-8	Temporary activation is expired. Please contact your dealer.
-9	Reactivation of dongle failed or dongle is invalid. Please contact your dealer.
-10	This activation code is in use.
-11	The limit of maximum users is reached. Please retry later.
-12	Incorrect .xdat activation file. Please request a new .xdat file at your dealer.
-13	Dongle revoked.
-14	Dongle has the wrong use date.
-15	Dongle has the wrong minimum date.
-16	Activation has a wrong date (future date).

Code	Message
- 1000	Bad parameters. Please contact your dealer.
- 1001	.xdat activation file can't read. Verify the location and permission of .xdat file and contact your administrator.
- 1002	.xdat activation file can't write. Verify the location and permission of .xdat file and contact your administrator.
- 1003	Incorrect .xdat activation file. Please request a new .xdat file at your dealer.
- 1004	Incorrect .xdat activation file. Please request a new .xdat file at your dealer.
- 1005	Time is out. Please retry.
- 1006	Dongle not found. Please check if the dongle is correctly plugged in and if the dongle light is fixed.
- 1007	Dongle not found. Please check if the dongle is correctly plugged in and if the dongle light is fixed.
- 1008	Null register.
- 1009	The dongle is not working. Please contact your dealer.
- 1010	Reactivation of dongle failed or dongle is invalid. Please contact your dealer.
- 1011	Service not running. Restart the service and contact your dealer.
- 1012	Connection error. The server can't read or the info is missing. Restart the service and contact your dealer.
- 1013	The register file is missing. Verify permissions of the register folder or contact your dealer.

Code	Message
- 1020	Unsupported function.
- 1021	Bad index function.
-99	Unknown error. Please contact your dealer.
- 9999	Permission or Unknown error. Please contact your dealer.

Troubleshooting Registration Verification Code on Form Submission in neoTextil

valid for neoTextil 9

If you encounter issues with the trial license registration, follow these steps:

- [Step 1: New registration for dongle or UUID](#)
- [Step 2: Validate Your Email Account](#)
- [Step 3: Start the Trial License](#)
- [Troubleshooting: Email validation process](#)
- [Additional Troubleshooting: Checking Log File for Validation Issues](#)

Step 1: New registration for dongle or UUID

1. Plug in the Inedit dongle or use the UUID for registration.
2. Start the Photoshop and open [nT neoTextil Panel](#) from menu Plug-ins | neoTextil Panels.
3. Enter the account details in all required fields and click "Continue."

Step 2: Validate Your Email Account

1. A verification code is sent to your email after form submission.
2. Check your email for the code that is valid for 15 minutes.

Validate your account

Please enter '737964' number to validate your account. It's valid for 15 minutes.

Have questions? Contact us at +34 937 912 821 or via sales@inedit.com - [Privacy Policy](#)

3. Enter the code and click "Continue."
4. Note: A new verification code is generated for each form submission, which sends a new email.

The screenshot shows a window titled "nT neoTextil Panel - Activator" with a close button (X) in the top right corner. The main heading is "Verificación de la cuenta". Below it, the text reads: "Por favor, introduzca el código de verificación de 6 dígitos que enviamos al correo electrónico". There are six empty square boxes for entering the digits. Below the boxes, there are two links: "¿No recibió el código? Enviar el código de nuevo" and "¿Correo electrónico equivocado? Cambiar mi correo electrónico". At the bottom, there are two buttons: "Cancelar" and "Continuar".

Step 3: Start the Trial License

- After successful verification, you will receive a 30-day trial.
- Click "Continue Trial" to start using the application.

The screenshot shows a window titled "nT neoTextil Panel - Activator" with a close button (X) in the top right corner. The main heading is "¡Su prueba terminará dentro de 1 mes!". Below it, the text reads: "Su prueba terminará pronto. Puede continuar usando 'neoTextil' después de la prueba, comprándolo." At the bottom, there is a button labeled "Continuar prueba".

Troubleshooting: Email validation process

If you encounter validation issues, proceed with the following steps. These troubleshooting measures are designed to resolve any problems associated with the generation of verification codes during the trial license registration process.

- It may take a few moments for the email to arrive. Wait for a reasonable amount of time before assuming an issue.
- If the code has expired or you didn't receive the email, you can trigger a new code generation by submitting the registration form again.
- Double-check that the email entered during registration is correct. The verification code will be sent to this email.

Additional Troubleshooting: Checking Log File for Validation Issues

If the email validation process continues to fail, it's essential to explore the log file for potential insights into the issue. A log file named 'logInfo.txt' is generated, providing details about the validation attempts. By examining the log file, users can gain deeper insights into the email validation process and troubleshoot issues more effectively. This additional step can be crucial in resolving persistent problems during the trial license registration.

Follow these additional steps:

1. Locate the Log File:

- For macOS: Navigate to

```
/Users/USERNAME/Library/Application Support/Adobe/UXP/PluginsStorage/PHSP/24/External/com.inedit.nT.panels
```

- For Windows: Go to

```
C:\Users\USERNAME\AppData\Roaming\Adobe\UXP\PluginsStorage\PHSP\24\External\com.inedit.nT.panels
```

2. Use a text editor to open the 'logInfo.txt' file. This file contains detailed information about the registration and validation processes.

3. Look for entries related to the email validation process. The log file may provide error messages, timestamps, or specific details about why the validation is failing.

4. Common Issues in Log File:

- Check for any error messages indicating issues with the email server, network connectivity, or incorrect email formatting.
- Look for timestamps to identify when validation attempts were made and if there are patterns or recurring issues.

5. Based on the information in the log file, take appropriate actions to address the identified issues. This may involve correcting email details, checking network connections, or contacting support with specific error messages.

6. After addressing the issues found in the log file, retry the validation process. Monitor the log file for any new entries to ensure that the problems have been resolved.

7. If issues persist or if the log file indicates complex problems, consider reaching out to customer support. Provide them with the log file information.

neoTextil Panel shows demo (TRY) label when activation exists

Problem 1

Even the activation exists, the panel shows the "TRY" label which indicates that neoTextil is not activated. When clicking on it, the activator opens showing the activation days. Clicking on Continue will refresh the panel but still showing the "TRY" label.

Problem 2

When opening nT neoTextil Panel and clicking 'Continue', then a message appears that permissions to activate are not enough.

Reason

The permissions of the Inedit Software folder in Public Documents do not have enough permissions to write&save the XDAT activation file.

Solution in WINDOWS

1. Close Photoshop and navigate to the Photoshop folder and run the Photoshop application as administrator.

2. Open the Panel and the labels are gone.

Solution in macOS

Load the XDAT file in nT Activation Manager and restart Photoshop. Open the Panel and the labels are gone.
