RIP Software **neoStampa Delta**

For DTF

Quick Calibration

Calibrate your printer in just 2 steps and less than 30 minutes.

Print What You See

Control the colors you see on screen and get them on your prints.

Control Center

Manage printing queues, track real-time stats, and monitor ink costs.

Punch

Enhance designs with hole patterns or halftones for a softer, breathable feel.

Highlight Effect

Use highlight effect to strengthen white areas in your design.

16 inks + Fluors

Include in your color gamut up to 16 inks, even with fluorescent colors for a wide color range.

Cutting Machines

Add cutting marks to increase your production processes after printing.

Different Printers, Same Color

Print on different machines and different media obtaining identical colours.

Save up to 30% of white ink

Efficiently print on black with minimal ink usage and a comfortable t-shirt feel.

Optimize Color Gamut

Expand your color possibilities through our RGB profile generator.

Choke System

Precision white area adjustments with neoStampa Delta's choke system.

Calibrate Color Libraries

Accurately print your favorite color libraries, including Pantone™.

Color Knock Out

Remove your media color to create a softer hand feel maintaining vibrancy of the design colors.

Connect your web-to-print

Remove your media color to create a softer hand feel maintaining vibrancy of the design colors.
